

Alexandria Extrusion Company Acquires Doege Precision Machining, Inc.

Alexandria, MN – September 9, 2008: Alexandria Extrusion Company (AEC) and Doege Precision Machining, Inc. have signed an agreement for Alexandria Extrusion Company to acquire Doege Precision Machining, Inc., a leading provider of precision machined, ferrous and non-ferrous components. The board of directors and executive staff of AEC are pleased to announce this acquisition. “This purchase provides exciting opportunities for AEC to offer additional products and services to its customers, subsidiaries and manufacturing alliance partners,” stated AEC’s CEO, Tom Schabel. Through this acquisition, Doege Precision Machining, Inc. will retain its name and operate as a stand-alone precision manufacturer to its long term customer base. Doege’s customers will also benefit from the additional products and services available as a result of this acquisition. Doege’s owner, Sandy Doege, will be retiring while Ben Doege, Chris Doege, Nathan Doege, and Pat Doege will remain involved in the business.

AEC is committed to provide its customers with additional processes and products, creating value through Quick Response Manufacturing (QRM), superior quality systems and reliable service from its network of manufacturing capabilities.

“Doege will be a complimentary and strategic addition to the products and services currently provided by AEC where its *people make a difference*,” said Schabel. The vision shared by the two companies is to continue to grow and work collaboratively to combine the core competencies and strengths of each organization as a premier supplier of engineered products. Doege’s success can be attributed to its quality service and products provided over the past 36 years.

About Alexandria Extrusion Company

Alexandria Extrusion Company is an ISO 9001:2000 certified supplier of precision aluminum extrusions, including advanced engineering services and innovative value-added operations. The company offers custom aluminum extrusion products with the highest degree of quality and tightest tolerances afforded through the aluminum extrusion process.

With over 40 years of experience, Alexandria Extrusion Company (AEC) provides assistance beginning with prototype development through final production. The end result: customized aluminum extrusions that effectively meet its customers’ exact specifications. AEC is known for developing and investing in 40+ years of innovative manufacturing practices and holds true to its preferred, historical existence in the industry. The company has become a market driven organization by creating solutions to market needs, while providing domestically enhanced manufacturing processes and systems to serve its customers globally.

About Doege Precision Machining, Inc.

Since 1972, Doege Precision Machining has been providing precision CNC milling, turning, cylindrical grinding, honing, and assembly services, using a wide variety of materials and shapes.

Services include full engineering and manufacturing support during new product development, including casting, forging and extrusion design. From design to prototypes through production, Doege Precision Machining is a true “partner” and a valuable resource.
